Chemlube Multipurpose Automatic Transmission Fluid

Chemlube Automatic Transmission Fluid is an automatic transmission fluid formulated to meet the needs of high performance, multi-purpose, power transmission fluid requirements. It is designed for use in passenger car and light truck automotive transmissions. It is a blend of high quality base oils and premium additives that provide outstanding oxidation and thermal stability, friction control, load-carrying ability, corrosion and wear protection as well as preventing the accumulations of deposits and the formation of sludge, varnish, and foam. It is especially effective in reducing and minimizing annoying transmission "chatter", and provides fast circulation during cold weather and excellent lubrication and performance when hot.

FEATURES AND BENEFITS:

- Universal unlicensed product that meets prior GM/Ford ATF standards.
- Allison C-4 and other applications calling for use of DIIIH/M quality ATF.
- Provides quiet shifting.
- Reduces wear of critical parts.
- Reduces maintenance costs and extends transmission life.
- Outstanding thermal stability and oxidation resistance.
- Eliminates transmission noise and vibration.
- Inhibits foaming.
- Protects transmission against rust, corrosion and varnish

TYPICAL PROPERTIES:

<u>Test</u>	<u>Method</u>	<u>Results</u>
Viscosity 100C cSt	ASTM D445	36.07
Viscosity 40C cSt	ASTM D445	7.34
Viscosity Index	ASTM D2270	175
Pour Point, C	ASTM D97	< -38
Phosphorus, ppm	Spectrometer	240

NOTE: Values are typical only. Due to ongoing research, development and product improvement, product formulas are subject to change without notice. Chemlube International cannot know all the uses and conditions to which this product may be subjected therefore it is the user's responsibility to ascertain that it is suitable for any intended use or application.
